

Proposal for picnic benches in St Mary's churchyard

This is a proposal for two picnic benches

The picnic benches (funded by a council sustainable communities grant) are proposed to be sited in the grassy area south of the tower. There are no public picnic benches in the village and the hope is the it will help more local people to enjoy the churchyard, and that visiting walkers and cyclists will also make use of them. This all makes us a more welcoming place, serving the community.

The design is made from sustainably sourced Swedish Redwood. They need no maintenance, are good quality and will look nice in the space. The area marked in red shows the area of the churchyard they will be placed.
